Maritime Heritage Data Products Creation

Project Title	Maritime Heritage Data Products Creation
Project Summary	Assist maritime heritage staff to create one-page summaries for Florida Keys National Marine Sanctuary's known historical resources and/or events using existing information, reports, and images.
Country	United States

Project Description

Participant will have shared access to images, reports, FKNMS documents and a template for use in creating 20+ data pages of selected resources. Participant will organize folders with images they select for use in the publication and text with reference to its source, and will create draft documents using the MS Word template. Once created, these data-pages will be used for story-maps, social media features, and educational outreach.
